

Development of a novel biosensor platform for protein detection Julia Metzner defended her doctoral thesis

Congratulations!

Julia Metzner defended her doctoral thesis about “Development of a novel biosensor platform for protein detection” (German original title “Entwicklung einer neuartigen Biosensor-Plattform zur Protein-Detektion”) on December 5th, 2019.

The research work for her dissertation in cooperation with industrial partners.

Dr. Metzner already published parts of her thesis in a peer-reviewed journal. Examples are:

J. Metzner, K. Luckert, K. Lemuth, M. Hämmerle, R. Moos, Towards an Electrochemical Immunosensor System with Temperature Control for Cytokine Detection, *Sensors*, **18**, 1309 (2018), doi: 10.3390/s18051309
