

New team member in collaboration with the group of Prof. Christina Roth

Philipp Hawe started on February, 1st

Welcome, Mr. Hawe!

The German Research Foundation (DFG) granted a joint project between the department of Prof. Dr.-Ing. Christina Roth (Werkstoffverfahrenstechnik, WV) and our group. We are happy to announce that Philipp Hawe, M.Sc., will support jointly both groups as a project engineer and doctoral student. He will work on the project “Pulse method for long-term stable and selective CO₂ electrolysis to ethene on copper-based gas diffusion electrodes”. This DFG-funded project combines the expertise of the Roth group and the Moos group.

Philipp Hawe started his academic career in 2015 when studying “Angewandte Chemie” at the Simon-Ohm-Hochschule in Nürnberg. He completed his studies at the University of Uppsala, Sweden, where he earned his master’s degree in “Chemistry”.

Philipp Hawe together with Prof. Moos and Dr. Hämmerle at his first working day in the lab.
