

New team member to support the gas sensor lab

Annika Braun started on October 1st

A warm welcome to the Department of Functional Materials!

Annika Braun joined our team on October 1, 2026. She will be primarily (though not exclusively) responsible for the chair's gas-related infrastructure and will conduct measurements using novel hydrocarbon gas sensors.

We are very pleased to have Annika Braun on board and wish her a successful start with us and many exciting new discoveries.

Annika Braun at her preliminary desk.
