

SBS6 – 6th International Sodium Battery Symposium in Dresden, Germany

Sodium Cathode Composites made by Powder Aerosol Deposition for Sodium All Solid-State Batteries

The Sodium Battery Symposium (SBS) is the conference for scientific exchange on sodium batteries in Europe. It is annually held in Dresden, Germany. The SBS covers all aspects of Na-based batteries, from basic research to systems, testing, and applications. It strengthens the community around sodium batteries.

In 2025, Mutlucan Sozak gave a poster presentation on cathode composites for sodium solid-state batteries on behalf of our chair.
